

How to create a vocabulary presentation slide

- 1) We insert a table by clicking on this icon and choosing the number of cells we want.

- 2) We resize the table and we drag it to the place we'd like it to be.
- 3) We insert the pictures. We may have saved them in a folder or we may use free clipart from Microsoft.
- 4) Then we write the vocabulary labels. We can use a text box or Word Art.
- 5) Finally, the "Entrance" effect is added by right-clicking on each label and choosing "Custom Animation".
