

MYSTERY PICTURE – POWERPOINT 2010

- 1) Visit <http://www.flickr.com/search/advanced/> and search for the pictures you need. Do not forget to tick the box “Only search within Creative-Commons licensed content”. When you have chosen the picture, download the size you prefer. To access the download screen and choose sizes, you can choose “View all sizes” from the drop-down menu “Actions” or click on the magnifying glass.

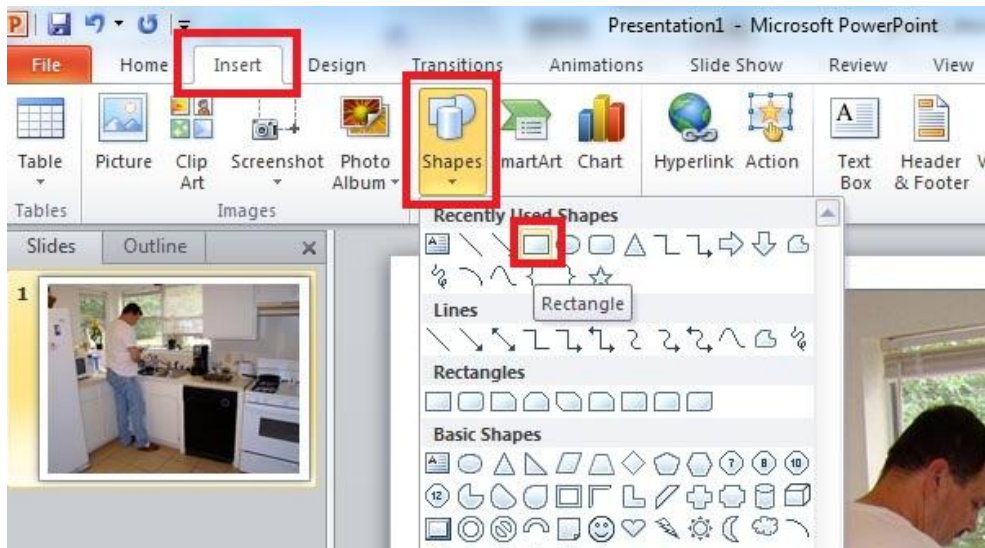

- 2) Create a PowerPoint presentation. Choose a blank slide to begin with or delete any objects (text boxes, etc) the default slide may have.
- 3) Go to Insert / Picture and choose the picture file from your computer.
- 4) Resize the picture by right-clicking on it and choosing 18 cm in height, which will probably lead to approximately 24 cm in width. You can also resize the picture by clicking on the corner of the picture and dragging the mouse to adjust the size.

- 5) Go to the Insert tab and choose a suitable shape to cover a part of the picture.

- 6) Drag the mouse to create the shape that will cover a part of the picture.
- 7) Click on the shape and go to the Animations tab. Choose an exit effect from the drop-down menu. Repeat this process with as many shapes as necessary. Animate first the one you want to disappear first. If you decide to change the order of animation effects, you can do this by going to the animation pane and dragging the animation effects up or down.

- 8) If appropriate, write the information about the author and the origin of the picture in a text box.
