

VOCABULARY TABLE – IMPRESS (Libre Office 3)

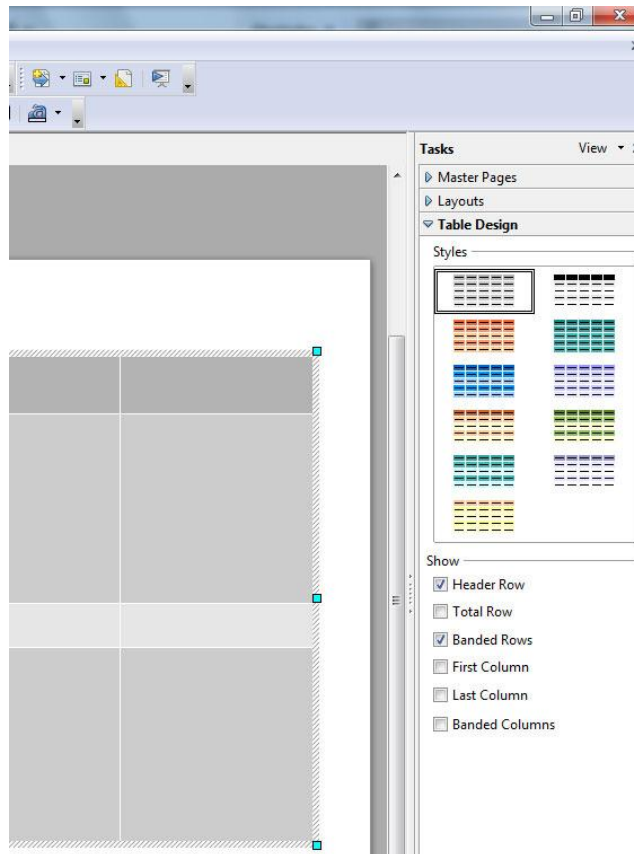

- 1) Visit <http://www.flickr.com/search/advanced/> and search for the pictures you need. Do not forget to tick the box “Only search within Creative-Commons licensed content”. When you have chosen the picture, download the size you prefer. To access the download screen and choose sizes, you can choose “View all sizes” from the drop-down menu “Actions” or click on the magnifying glass.

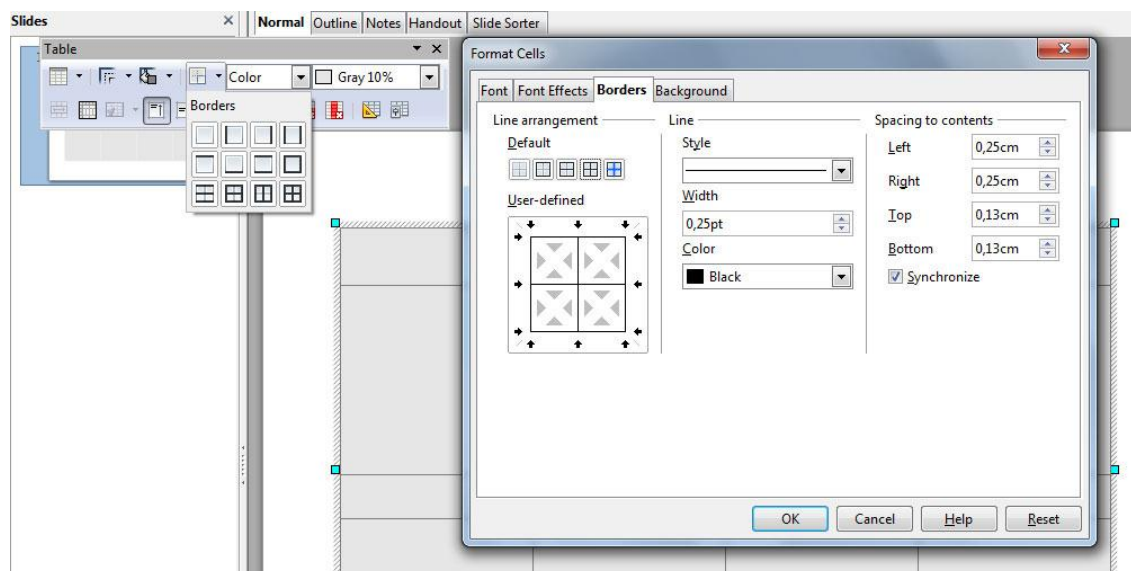

- 2) Create an Impress presentation. Choose a blank slide to begin with or delete any objects (text boxes, etc) the default slide may have.
- 3) Insert a table from the Insert menu or from the icon in the toolbar.

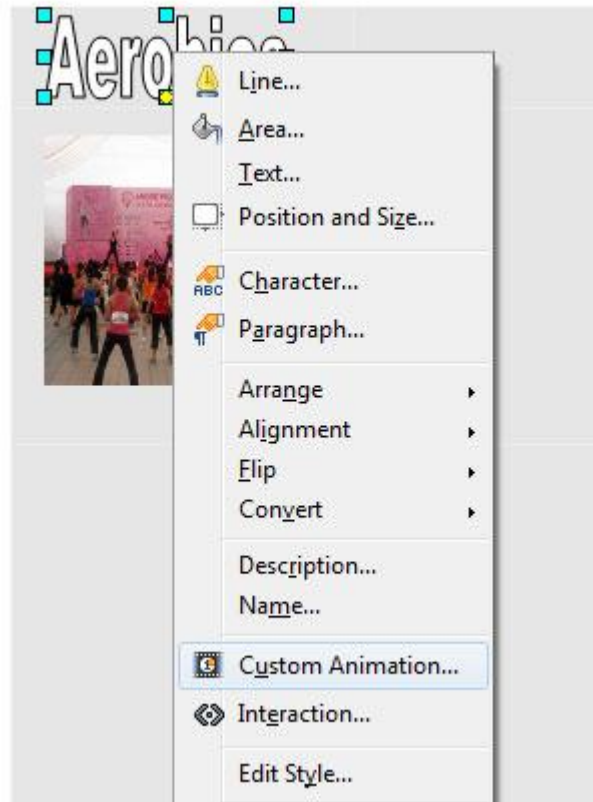

- 4) Resize the table as a whole and the cells so that you have a smaller space for the text and a bigger space for the picture. You may change the background from the menu on the right. You can also decide not to have a header row (the first row with a different colour).

- 5) You can choose the table border style from the table toolbar or from the context menu that appears on right-click.

- 6) Insert the pictures and type the words that identify these pictures. Use “Fontwork” from the Drawing toolbar to type the words. This way, it’ll be easy to add an entrance effect to these words, so you can hide them initially and ask students if they know the name of the object or action in the picture.

- 7) Repeat the process with the rest of vocabulary elements in the picture. If appropriate, write the information about the author and the origin of the picture in a text box.
